

Misconception About Sex Education (part 1 of 2) - Marikina Science High School

READ THIS FIRST

This video is the official entry of Marikina Science High School to the Real-IT Documentary Film Festival hosted by Informatics Philippines last November 26, 2010 at Teatro Marikina.

This project was made in about two weeks, and due to lack of time, we decided to focus the filming to the interviews from knowledgeable people. Then, during the narration, we decided to study the parts of the different episodes from Discovery Health Channel. After selecting the necessary images for the narration, we removed its audio since it doesn't fit in our project, and then used it to give imagery to the viewers while the narration is ongoing. The entry was the first runner-up. This documentary was made for everyone. Since it was not shown during the program, the I.Team decided to upload the video online, so that the message would not be imprisoned.

In connection to that matter, we ENCOURAGE the other teams especially the winning entry from Marikina Catholic School and the entry of Sta. Elena High School which was the second runner-up to also upload their works online, so that all of our fellow students would be able to see and feel the essence of the film festival.

THANK YOU.

*Please watch both parts of the video.
